

Introducing Lot Controlled Orders for Simple Western Consumables

Now you can place large single-lot orders for Simple Western Consumables. All units in an order will have the same lot number, provided the quantity ordered is not more than the maximum single-lot order quantity specified.

With Simple Western Lot Controlled Orders, you can:

- Minimize the number of lot-to-lot bridging studies by securing larger consumables lots
- Reduce the risk of errors and simplify inventory management
- Order with confidence and flexibility

These orders are ideal for larger, longitudinal studies requiring controlled consumable lots. Each order is compatible with a 24 x 25-capillary format and is sufficient for 600 samples per kit. To get a complete assay for 600 samples, order equal numbers of Capillary Cartridge Kits, Pre-Filled Plates and Reagents Kits, EZ Standards, and Detections Modules. All kits are built to order with a minimum order quantity of 5 and a lead time of 4-6 weeks.
