**AF394MFV500**

CCL18/PARC Antibody [mFluor Violet 500 SE]

**Product Information**

|                      |                                                                                             |
|----------------------|---------------------------------------------------------------------------------------------|
| <b>Unit Size</b>     | 0.1 ml                                                                                      |
| <b>Concentration</b> | Please see the vial label for concentration. If unlisted please contact technical services. |
| <b>Storage</b>       | Store at 4C in the dark.                                                                    |
| <b>Clonality</b>     | Polyclonal                                                                                  |
| <b>Preservative</b>  | 0.05% Sodium Azide                                                                          |
| <b>Isotype</b>       | IgG                                                                                         |
| <b>Conjugate</b>     | mFluor Violet 500 SE                                                                        |
| <b>Purity</b>        | Antigen Affinity-purified                                                                   |
| <b>Buffer</b>        | 50mM Sodium Borate                                                                          |

**Product Description**

|                                |                                                                                                                                                                                                                                                                                                                                                                                  |
|--------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Host</b>                    | Goat                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Gene ID</b>                 | 6362                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Gene Symbol</b>             | CCL18                                                                                                                                                                                                                                                                                                                                                                            |
| <b>Species</b>                 | Human                                                                                                                                                                                                                                                                                                                                                                            |
| <b>Specificity/Sensitivity</b> | Detects human CCL18/PARC in direct ELISAs and Western blots. In direct ELISAs, approximately 15% cross-reactivity with recombinant human (rh) MIP-1 $\alpha$ and recombinant mouse MIP-1 $\alpha$ is observed and less than 10% cross-reactivity with rhMPIF $\square$ 1, recombinant viral (rv) MIP $\square$ I, rvMIP $\square$ II, rhHCC-1, and rhMIP-1 $\delta$ is observed. |
| <b>Immunogen</b>               | <i>E. coli</i> -derived recombinant human CCL18/PARC Ala21-Ala89<br>Accession # P55774                                                                                                                                                                                                                                                                                           |
| <b>Notes</b>                   | mFluor(TM) is a trademark of AAT Bioquest, Inc. This conjugate is made on demand. Actual recovery may vary from the stated volume of this product. The volume will be greater than or equal to the unit size stated on the datasheet.                                                                                                                                            |

**Product Application Details**

|                              |                                                                        |
|------------------------------|------------------------------------------------------------------------|
| <b>Applications</b>          | Western Blot, CyTOF-ready, Intracellular Staining by Flow Cytometry    |
| <b>Recommended Dilutions</b> | Western Blot, Intracellular Staining by Flow Cytometry, CyTOF-ready    |
| <b>Application Notes</b>     | Optimal dilution of this antibody should be experimentally determined. |
