| <b>Host</b>                        | Sheep                                                                                                                                                                                                                                                                                                   |
| <b>Gene ID</b>                     | 183                                                                                                                                                                                                                                                                                                     |
| <b>Gene Symbol</b>                 | AGT                                                                                                                                                                                                                                                                                                     |
| <b>Species</b>                     | Mouse                                                                                                                                                                                                                                                                                                   |
| <b>Specificity/Sensitivity</b>     | Detects mouse Serpin A8/Angiotensinogen in direct ELISAs and Western blots. In direct ELISAs, approximately 24% cross-reactivity with recombinant human Angiotensinogen is observed, and less than 1% cross-reactivity with recombinant mouse (rm) Serpin A1, rmSerpin C1, and rmSerpin F2 is observed. |
| <b>Immunogen</b>                   | Chinese hamster ovary cell line CHO-derived recombinant mouse Serpin A8/Angiotensinogen<br>Asp25-Val477<br>Accession # AAH19496                                                                                                                                                                         |
