| Gene Symbol                 | IFNAR2                                                                                                                                                                                                                                                                                                |
| Species                     | Human                                                                                                                                                                                                                                                                                                 |
| Specificity/Sensitivity     | Detects human IFN- $\alpha$ / $\beta$ R2 C-Terminus in direct ELISAs and Western blots. In direct ELISAs, less than 1% cross-reactivity with recombinant human (rh) IFN- $\alpha$ / $\beta$ R2a, rhIFN- $\alpha$ / $\beta$ R $\alpha$ , and recombinant mouse IFN- $\alpha$ / $\beta$ R2 is observed. |
| Immunogen                   | <i>E. coli</i> -derived recombinant human IFN- $\alpha$ / $\beta$ R2 C-Terminus<br>Ser351-Met514<br>Accession # P48551                                                                                                                                                                                |
