| Gene Symbol                 | CeHV15gBCRF1                                                                                                                                                                                                                                                                                                                                    |
| Species                     | Viral                                                                                                                                                                                                                                                                                                                                           |
| Specificity/Sensitivity     | Detects viral EBV IL $\square$ 10 in direct ELISAs and Western blots. In direct ELISAs, approximately 35% cross-reactivity with recombinant canine IL $\square$ 10 and recombinant human IL $\square$ 10 is observed and less than 10% cross-reactivity with recombinant mouse IL $\square$ 10 and recombinant rat IL $\square$ 10 is observed. |
| Immunogen                   | <i>E. coli</i> -derived recombinant viral EBV IL $\square$ 10<br>Gln26-Arg170<br>Accession # P03180                                                                                                                                                                                                                                             |
