| Gene Symbol                 | KEL                                                                                                                                                                                                               |
| Species                     | Human                                                                                                                                                                                                             |
| Specificity/Sensitivity     | Detects human Kell in direct ELISAs and Western blots. In direct ELISAs and Western blots, no cross-reactivity with recombinant human ECE-2, recombinant human Neprilysin, or recombinant mouse Kell is observed. |
| Immunogen                   | Mouse myeloma cell line NS0-derived recombinant human Kell<br>Asn68-Trp732<br>Accession # P23276                                                                                                                  |
| Product Application Details |                                                                                                                                                                                                                   |
| Applications                | Western Blot                                                                                                                                                                                                      |
| Recommended Dilutions       | Western Blot                                                                                                                                                                                                      |
| Application Notes           | Optimal dilution of this antibody should be experimentally determined.                                                                                                                                            |
