| Recommended Dilutions                           | Flow Cytometry                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Application Notes                               | Optimal dilution of this antibody should be experimentally determined. For optimal results using our Tandem dyes, please avoid prolonged exposure to light or extreme temperature fluctuations. These can lead to irreversible degradation or decoupling. When staining intracellular targets, specific attention to the fixation and permeabilization steps in your flow protocol may be required. Please contact our technical support team at technical@novusbio.com if you have any |

questions.
