| Gene ID                     | 2194                                                                                                                                                                                                                                                                                      |
| Gene Symbol                 | FASN                                                                                                                                                                                                                                                                                      |
| Species                     | Human                                                                                                                                                                                                                                                                                     |
| Specificity/Sensitivity     | Detects Fatty Acid Synthase/FASN in direct ELISAs and Western blots. In direct ELISAs, approximately 25% cross-reactivity with recombinant mouse (rm) Ephrin-A2 is observed and no cross-reactivity with recombinant human (rh) Ephrin-A3, -B3, rmEphrin-A4, -A5, -B1 or -B2 is observed. |
| Immunogen                   | <i>E. coli</i> -derived recombinant human Fatty Acid Synthase/FASN Ser10-Cys212<br>Accession # P49327                                                                                                                                                                                     |
