#### Images

Immunohistochemistry: TLR7 Antibody [NB100-56682] - Sections of nasal biopsies were incubated with antibodies against TLR9 (C) visualized by 3, 3-diaminobenzidine (brown). In control slides (F), Nseries universal negative control reagent was used. All sections were accompanied with a square magnification. All slides were counterstained with haematoxylin (blue). The figure shows one representative biopsy out of four (3 male, 1 female). The arrows indicate positive stained cells. Image collected and cropped by CiteAb from the following publication (//doi.org/10.1371/journal.pone.0098239) licensed under a CC-BY license.
