<b>Reactivity Notes</b>	Please note that this antibody is reactive to Mouse and derived from the same host, Mouse. Additional Mouse on Mouse blocking steps may be required for IHC and ICC experiments. Please contact Technical Support for more information.
<b>Specificity/Sensitivity</b>	NB100-65541 recognizes a monomorphic determinant of the rat I-A antigen present on B lymphocytes, dendritic cells, some macrophages and certain epithelial cells. This antibody cross reacts with certain mouse strains of MHC haplotypes k and s. This antibody does not react with C57BL6 or C57BL6/j mice because they are haplotype b. Analysis of recombinant mouse strains showed that the determinants mapped to the I-A region. The clone does not react with Rat BDIX strain. Please be aware of the possible size variance seen in western blot.
<b>Immunogen</b>	Rat thymocyte membrane glycoproteins
