EMR3 Antibody (3D7) [Allophycocyanin/Cy7]

services. Store at 4C in the dark. Do not freeze. Clonality Monoclonal Clone 3D7 Preservative 0.05% Sodium Azide Isotype IgG Conjugate Allophycocyanin/Cy7 Purity Protein G purified Buffer PBS Product Description Host Host Armenian Hamster Gene ID 84658 Gene Symbol ADGRE3 Species Human Reactivity Notes Reacts with Human. Specificity/Sensitivity NB100-65935 recognizes human epidermal growth factor (EGF) module-containing much-like hormone receptors 3 (EMR3), which is a 56kD member on the EGF-7 transmembrane (TM7) family of adhesion receptors. EMR3 is expressed at the cell surface as a heterodimer. The molecule is predominantly expressed on granulocytes, and at lower levels on mature myeloid cells, monocytes and dendritic cells. The exact functions of EMR3 and its ligands havinot yet been determined. Immunogen ARHO-EMR3-CD97 (EGF1) transfectants Product Application Details Flow Cytometry, Immunoprecipitation Applications Flow Cytometry, Immunoprecipitation Application Notes Optimal dilution of this antibody should be experimentally determined. For optimal results using our Tandem dyes,
