Images

Western Blot: Connexin 43/GJA1 [p Ser368] Antibody [NB100-722] - rat hippocampal lysate showing specific immunolabeling of the ~43k connexin43 phosphorylated at Ser368 (Control). The phosphospecificity of this labeling is shown in the second lane (lambda-phosphatase). The blot is identical to the control except that it was incubated (1200 units for 30 min) before being exposed to the phospho-Ser368 connexin43 antibody. The immunolabeling of connexin43 is completely eliminated by treatment.
