Western Blot: CaMKII alpha [p Thr286] Antibody [NB300-184] - Analysis of Rat brain lysate showing specific immunolabeling of the ~50k α - and the ~60k beta-CaM Kinase II phosphorylated at Thr286 (Control). The phosphospecificity of this labeling is shown in the second lane (lambda-phosphatase: lambda-Ptase). The blot is identical to the control except that it was incubated in lambda-Ptase (1200 units for 30 min) before being exposed to the Anti-Thr286 CaM Kinase II. The immunolabeling is completely eliminated by treatment with lambda-Ptase.
