## Images

Western Blot: Synapsin I [p Ser549] Antibody [NB300-744] - Western blot of rat brain lysate showing specific immunolabeling of the ~78k synapsin I phosphorylated at Ser549 (Control). The phosphospecificity of this labeling is shown in the second lane (lambda-phosphatase: lambda-Ptase). The blot is identical to the control except that it was incubated in lambda-Ptase (1200 units for 30 min) before being exposed to the Anti-Phospho Ser549 synapsin I. The immunolabeling is completely eliminated by treatment with lambda-Ptase.

Immunohistochemistry: Synapsin I [p Ser549] Antibody [NB300-744] - Immunostaining of cultured mouse caudate neurons showing synapsin I when phosphorylated at Ser549.
