P2X7/P2RX7 Antibody (Hano43) [PerCP]

| Product Information          |   |
|------------------------------|---|
| Unit Size                    | 0.1 ml  |
| Concentration                | Please see the vial label for concentration. If unlisted please contact technical services.   |
| Storage                      | Store at 4C in the dark.  |
| Clonality                    | Monoclonal  |
| Clone                        | Hano43  |
| Preservative                 | 0.05% Sodium Azide  |
| Isotype                      | IgG2b   |
| Conjugate                    | PerCP   |
| Purity                       | Protein G purified  |
| Buffer                       | PBS   |
| Product Description          |   |
| Description                  | This conjugate is made on demand. Actual recovery may vary from the stated volume of this product. The volume will be greater than or equal to the unit size stated on the datasheet.   |
| Host                         | Rat   |
| Gene ID                      | 5027  |
| Gene Symbol                  | P2RX7   |
| Species                      | Mouse   |
| Reactivity Notes             | Reacts with Mouse.  |
| Specificity/Sensitivity      | This antibody recognises the P2X purinoceptor 7, also known as P2X7. The P2X7 ATP receptor has a distinctive long C-terminal tail with multiple potential protein and lipid interaction motifs and is highly polymorphic. It is a cation selective ion channel that opens up on binding of extracellular ATP. Sustained activation by extracellular ATP results in the formation of a reversible pore in the plasma membrane that is permeable to hydrophilic solutes of up to 900 Da. Once a pore is opened massive upset of cytoplasmic ion homeostasis occurs and the pore stays open as long as it is bound by ATP. Should ATP stimulation continue the cell will become irreversibly damaged and die. P2X7 plays a key role in the maturation and release of IL-1 and other IL-1 family members during inflammation. As such, P2X7 blockers might be useful as anti-inflammatory agents. |
| Immunogen                    | A P2X7-expression construct and a final boost with P2X7-transfected HEK cells   |
| Product Application Details  |   |
| Applications                 | Flow Cytometry, Immunocytochemistry/ Immunofluorescence   |
| <b>Recommended Dilutions</b> | Flow Cytometry, Immunocytochemistry/ Immunofluorescence   |
|                              |   |
