## NBP1-41266PECY55

0.1 ml
Please see the vial label for concentration. If unlisted please contact technical services.
Store at 4C in the dark. Do not freeze.
Monoclonal
IM7
0.05% Sodium Azide
lgG2b
PE/Cy5.5
Protein A purified
PBS
Rat
960
CD44
Human, Mouse, Canine, Equine, Feline
Cat (100%). Canine reactivity reported from a verified customer review.
Cell Membrane Marker
The rat monoclonal antibody IM7 reacts with CD44 antigen (Phagocyte glycoprotein 1), an 80-95 kDa transmembrane glycoprotein (hyaladherin family) present on the most of cells and tissues (leukocytes, endothelial cells, mesenchymal cells, etc.); it is negative on platelets and hepatocytes. The antibody reacts with all isoforms of mouse CD44.
Dexamethasone-induced cells of the SJL mouse spontaneous myeloid leukemia M1
Flow Cytometry
Flow Cytometry
Optimal dilution of this antibody should be experimentally determined. For optimal results using our Tandem dyes, please avoid prolonged exposure to light or extreme temperature fluctuations. These can lead to irreversible degradation or decoupling. When staining intracellular targets, specific attention to the fixation and permeabilization steps in your flow protocol may be required. Please contact our technical support team at technical@novusbio.com if you have any questions.
