| Gene Symbol                 | AGR3                                                                                                                                                                          |
| Species                     | Human                                                                                                                                                                         |
| Specificity/Sensitivity     | The antibody AGR3.1 recognizes the epitope HETTDKNLS within the AGR3 (AG3) protein (19-20 kDa); a secreted cytoplasmic protein which can serve as a marker of carcinogenesis. |
| Immunogen                   | Purified human AGR3 protein                                                                                                                                                   |
| Product Application Details |                                                                                                                                                                               |
| Applications                | Western Blot, Immunocytochemistry/ Immunofluorescence, Immunohistochemistry, Immunohistochemistry-Frozen, Immunohistochemistry-Paraffin                                       |
| Recommended Dilutions       | Western Blot, Immunohistochemistry, Immunocytochemistry/ Immunofluorescence, Immunohistochemistry-Paraffin, Immunohistochemistry-Frozen                                       |
| Application Notes           | Optimal dilution of this antibody should be experimentally determined.                                                                                                        |
