#### NBP2-05951

CCL15/MIP-1 delta Overexpression Lysate

| Unit Size       0.1 mg         Concentration       The exact concentration of the protein of interest cannot be determined for overexpression lysates. Please contact technical support for more information.         Storage       Store at -80C. Avoid freeze-thaw cycles.         Buffer       RIPA buffer         Target Molecular Weight       10.1 kDa         Product Description       Expression Host: HEK293T         Description       Expression Host: HEK293T         Plasmid: RC213037       Accession#: NM_032965         Protein Tag: C-MYC/DDK       You will receive 1 vial of lysate (100ug), 1 vial of empty vector negative control (00ug), and 1 vial of 2xSDS sample buffer (250ul), Each vial of cell lysate contains 100ug of total protein (at 1 mg/ml). The 2xSDS Sample Buffer consists of 4% SDS, 125mM Tris-HCI pH6.8, 10% Glycerol, 0.002% Bromophenol blue, 100mM DTT.         Gene ID       6359         Genee Symbol       CCL15         Species       Human         Notes       HEK293T cells in 10-cm dishes were transiently transfected with a non-lipid polymer transfection reagent specially designed and manufactured for large volume DNA transfection. Transfected cells were ycalined for large volume DNA transfection. Transfected cells were ycalined for 48ms before concentration was measured by BCA protein assay kit.         Lysate Type       Overexpression         Product Application Details       Western Blot   | Product Information         |   |  |

| Application Notes | This product is intended for use as a positive control in Western Blot.<br>Overexpression of the target protein was confirmed using an antibody to DDK<br>(FLAG) epitope tag ( <u>NBP1-71705</u> ) present on the protein construct.   |
|-------------------|--|
|                   | Each vial of cell lysate contains 100ug of total protein which should be sufficient for 20-50 reactions. Depending on over-expression level, antibody affinity and detection system, some lysates can go as low as 0.1 ug per load. We recommend starting with 5ug of cell lysate. Add an equal amount of cell lysate and 2X SDS Sample buffer and boil the SDS samples for 10 minutes before loading. |
