NBP2-08990

PDE3B Overexpression Lysate

Product Information		
Unit Size 0.1 mg	0.1 mg	
	The exact concentration of the protein of interest cannot be determined for overexpression lysates. Please contact technical support for more information.	
Storage Store a	Store at -80C. Avoid freeze-thaw cycles.	
Buffer RIPA t	RIPA buffer	
Target Molecular Weight124.2	124.2 kDa	
Product Description		
Description PDE3	B Transient Overexpression Lysate	
Expres	sion Host: HEK293T	
Plasmi	d: RC219619	
Access	sion#: NM_000922	
Proteir	Tag: C-MYC/DDK	
(100ug contair	Il receive 1 vial of lysate (100ug), 1 vial of empty vector negative control), and 1 vial of 2xSDS sample buffer (250ul). Each vial of cell lysate is 100ug of total protein (at 1 mg/ml). The 2xSDS Sample Buffer consists SDS, 125mM Tris-HCI pH6.8, 10% Glycerol, 0.002% Bromophenol blue, 1 DTT.	
Gene ID 5140	5140	
Gene Symbol PDE3E	PDE3B	
Species Human	Human	
polyme volume collecti 150mM PMSF	HEK293T cells in 10-cm dishes were transiently transfected with a non-lipid polymer transfection reagent specially designed and manufactured for large volume DNA transfection. Transfected cells were cultured for 48hrs before collection. The cells were lysed in modified RIPA buffer (25mM Tris-HCI pH7.6, 150mM NaCl, 1% NP-40, 1mM EDTA, 1xProteinase inhibitor cocktail mix, 1mM PMSF and 1mM Na3VO4, and then centrifuged to clarify the lysate. Protein concentration was measured by BCA protein assay kit.	
Lysate Type Overex	Overexpression	
Product Application Details		
Applications Wester	n Blot	
Recommended Dilutions Wester	Western Blot	

Application Notes	This product is intended for use as a positive control in Western Blot. Overexpression of the target protein was confirmed using an antibody to DDK (FLAG) epitope tag (<u>NBP1-71705</u>) present on the protein construct.
	Each vial of cell lysate contains 100ug of total protein which should be sufficient for 20-50 reactions. Depending on over-expression level, antibody affinity and detection system, some lysates can go as low as 0.1 ug per load. We recommend starting with 5ug of cell lysate. Add an equal amount of cell lysate and 2X SDS Sample buffer and boil the SDS samples for 10 minutes before loading.
