NBP2-09929

ARL6 Overexpression Lysate		
Product Information		
Unit Size	0.1 mg	
Concentration	The exact concentration of the protein of interest cannot be determined for overexpression lysates. Please contact technical support for more information.	
Storage	Store at -80C. Avoid freeze-thaw cycles.	
Buffer	RIPA buffer	
Target Molecular Weight	20.9 kDa	
Product Description		
i roddot bescription		
Description	ARL6 Transient Overexpression Lysate	
•	ARL6 Transient Overexpression Lysate Expression Host: HEK293T	
•		
•	Expression Host: HEK293T	

0 ID	0.4400
	100mM DTT.
	of 4% SDS, 125mM Tris-HCl pH6.8, 10% Glycerol, 0.002% Bromophenol blue,
	contains 100ug of total protein (at 1 mg/ml). The 2xSDS Sample Buffer consists
	(100ug), and 1 vial of 2xSDS sample buffer (250ul). Each vial of cell lysate
	You will receive 1 vial of lysate (100ug), 1 vial of empty vector negative control

Gene Symbol ARL6	Selie ID	04100
	Gene Symbol	ARL6

Species	Human
---------	-------

•	
	HEK293T cells in 10-cm dishes were transiently transfected with a non-lipid polymer transfection reagent specially designed and manufactured for large volume DNA transfection. Transfected cells were cultured for 48hrs before collection. The cells were lysed in modified RIPA buffer (25mM Tris-HCl pH7.6, 150mM NaCl, 1% NP-40, 1mM EDTA, 1xProteinase inhibitor cocktail mix, 1mM
	PMSF and 1mM Na3VO4, and then centrifuged to clarify the lysate. Protein
	concentration was measured by BCA protein assay kit.

	-
Lysate Type	Overexpression

Product Application Details	
Applications	Western Blot
Recommended Dilutions	Western Blot

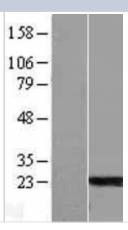

Application Notes

This product is intended for use as a positive control in Western Blot. Overexpression of the target protein was confirmed using an antibody to DDK (FLAG) epitope tag (NBP1-71705) present on the protein construct.

Each vial of cell lysate contains 100ug of total protein which should be sufficient for 20-50 reactions. Depending on over-expression level, antibody affinity and detection system, some lysates can go as low as 0.1 ug per load. We recommend starting with 5ug of cell lysate. Add an equal amount of cell lysate and 2X SDS Sample buffer and boil the SDS samples for 10 minutes before loading.
