Immunocytochemistry/Immunofluorescence: JunD Antibody [NBP2-38983] - Staining of human cell line SH-SY5Y shows localization to nucleoplasm.

Immunohistochemistry-Paraffin: JunD Antibody [NBP2-38983] - Staining of human placenta shows strong nuclear positivity in trophoblastic cells.

ChIP-Exo-Seq composite graph for Anti-JUND (NBP2-38983) tested in K562 cells. Strand-specific reads (blue: forward, red: reverse) and IgG controls (black: forward, grey: reverse) are plotted against the distance from a composite set of reference binding sites. The antibody exhibits robust target enrichment compared to a non-specific IgG control and precisely reveals its structural organization around the binding site. Data generated by Prof. B. F. Pugh's Lab at Cornell University.
