## NBP2-47692CL1

Cytochrome c Antibody (SPM389) [CoraFluor $^{\text{TM}}$  1]

Unit Size  O.1 ml  Concentration  Please see the vial label for concentration. If unlisted please contact technical services.  Storage  Store at 4C in the dark. Do not freeze.  Clonality  Monoclonal  Clone  SPM389  Preservative  No Preservative  Isotype  IgG2b Kappa  Conjugate  CoraFluor 1  Purity  Protein A or G purified  Buffer  PBS  Product Description  CoraFluor(TM) 1 is a high performance terbium-based TR-FRET (Time-Resolved Fluorescence Resonance Energy Transfer) or TRF (Time-Resolved Fluorescence) donor for high throughput assay development. CoraFluor(IM) 1 absorbs UV light at approximately 340 nm, and emits at approximately 490 nm, 545 nm, 585 nm and 620 nm. It is compatible with common accidency days that absorb at the emission wavelengths of CoraFluor(TM) 1. CoraFluor(TM) 1 can be used for the development of robust and scalable TR-FRET inding assays such as target engagement, ternary complex, protein-protein interaction and protein quantification assays.  Host  Mouse  Gene ID  54205  Gene Symbol  CYCS  Species  Human, Mouse, Rat, Amphibian, Canine, Drosophila, Equine, Pigeon  Reactivity Notes  Frog  Marker  Mitochondrial Marker  It recognizes an epitope within amino acids 93-104 of pigeon Cytochrome C, a well-characterized mobile electron transport protein that is essential to energy conversion in all aerobic organisms. In mammalian cells, this highly conserved protein is normally localized to the mitochondrial inter-membrane space. More recent studies have identified cytosolic cytochrome c as a factor necessary for activation of apoptosis. During apoptosis, cytochrome is required for activation of acapsase-3 (CPP32). Overexpression of Bez has been shown to prevent the translocation of cytochrome c, thereby blocking the apoptotic process.  Overexpression of Bax has been shown to induce the release of cytochrome in the cytosol without heme attached) and holocytochrome (i.e. cytochrome in the mitochondria with heme attached) and holocytochrome (i.e. cytochrome in the mitochondria is thought in citided b	Cytochilothic of this body (Cr.
