#### NBP2-47876FR

EpCAM/TROP1 Antibody (EGP40/826) [DyLight 680]

0.1 ml
Please see the vial label for concentration. If unlisted please contact technical services.
Store at 4C in the dark.
Monoclonal
EGP40/826
0.05% Sodium Azide
IgG1 Kappa
DyLight 680
Protein A or G purified
50mM Sodium Borate
Mouse
4072
EPCAM
Human, Mouse (Negative), Rat (Negative)
Epithelial Marker
-
Recognizes a 40-43kDa transmembrane epithelial glycoprotein, identified as epithelial specific antigen (ESA), or epithelial cellular adhesion molecule (Ep-CAM). Ep-CAM is expressed on baso-lateral cell surface in most simple epithelia and a vast majority of carcinomas. This antibody has been used to distinguish adenocarcinoma from pleural mesothelioma and hepatocellular carcinoma. It is also useful in distinguishing serous carcinomas of the ovary from mesothelioma. This epithelial antigen plays an important role as a tumor-cell marker in lymph nodes from patients with esophageal carcinoma otherwise classified as nodenegative. Epithelial antigen has also been suggested as a discriminator between basal cell and baso-squamous carcinomas, and squamous cell carcinoma of the skin.
