#### NBP2-50128PE

Neprilysin/CD10 Antibody (SS2/36) [PE]

| Nephrysin/6D10 Antibody (332/30) [1 E] |   |
|--|---|
| Product Information                    |   |
| Unit Size                              | 0.1 ml  |
| Concentration                          | Please see the vial label for concentration. If unlisted please contact technical services.   |
| Storage                                | Store at 4C in the dark.  |
| Clonality                              | Monoclonal  |
| Clone                                  | SS2/36  |
| Preservative                           | 0.05% Sodium Azide  |
| Isotype                                | IgG1  |
| Conjugate                              | PE  |
| Purity                                 | Protein A purified  |
| Buffer                                 | PBS   |
| Product Description                    |   |
| Host                                   | Mouse   |
| Gene ID                                | 4311  |
| Gene Symbol                            | MME   |
| Species                                | Human   |
| Immunogen                              | Common acute lymphoblastic leukaemia cells  |
| Notes                                  | This conjugate is made on demand. Actual recovery may vary from the stated volume of this product. The volume will be greater than or equal to the unit size stated on the datasheet. |
| Product Application Details            |   |
| Applications                           | Western Blot, Flow Cytometry, Immunohistochemistry, CyTOF-ready   |
|  |   |

| Product Application Details |  |
|-----------------------------|--|
| Applications                | Western Blot, Flow Cytometry, Immunohistochemistry, CyTOF-ready        |
| Recommended Dilutions       | Western Blot, Flow Cytometry, Immunohistochemistry, CyTOF-ready        |
| Application Notes           | Optimal dilution of this antibody should be experimentally determined. |

# **Images**

Neprilysin/CD10 Antibody (SS2/36) [PE] [NBP2-50128PE] - Vial of PE conjugated antibody. PE has two excitation maxima, 498 nm excited by the Blue laser (488 nm) and 565 nm excited by the Yellow-Green laser (561 nm). Both result in emission at 578 nm.
