## **NBP2-52677APCCY7**

EphA2 Antibody (1C1) [Allophycocyanin/Cy7] - Chimeric	
0.1 ml	
Please see the vial label for concentration. If unlisted please contact technical services.	
Store at 4C in the dark. Do not freeze.	
Monoclonal	
1C1	
0.05% Sodium Azide	
IgG Kappa	
Allophycocyanin/Cy7	
Protein A purified	
PBS	
Rabbit	
1969	
EPHA2	
Human	
Human	
1C1 binds specifically to the amino-termianal LBD (ligand-binding domain) region of the EphA2 ectodomain (lgG1 KD ~0.8 nM; Fab KD ~140 nM) and not to other related human Eph receptors such as EphA1, EphA2, and EphA4, or any EphB receptor family members.	
1C1 was isolated after screening of a non-immunized human Fab phage library. Selection was based on the ability to bind soluble human recombinant EphA2 (residues 183-510). The Fab was subsequently converted to full length human IgG1.	
Flow Cytometry	
Flow Cytometry	
Optimal dilution of this antibody should be experimentally determined. For optimal results using our Tandem dyes, please avoid prolonged exposure to light or extreme temperature fluctuations. These can lead to irreversible degradation or decoupling. When staining intracellular targets, specific attention to the fixation and permeabilization steps in your flow protocol may be required. Please contact our technical support team at technical@novusbio.com if you have any questions.
