NBP2-59620-100ug

Unit Size	SOX10 Antibody (SOX10/991)		
Concentration Storage Store at 4C. Clonality Monoclonal Clone SOX10/991 Preservative 0.05% Sodium Azide Isotype IgG2b Kappa Purity Protein A or G purified Buffer 10 mM PBS with 0.05% BSA Product Description Bescription Human Chromosome Location:22q13.1 200ug/ml of antibody purified from Bioreactor Concentrate by Protein A or G. Prepared in 10 mM PBS with 0.05% BSA & 0.05% azide. Also available WITHOUT BSA & azide at 1.0 mg/ml. (NBP2-59621) Antibody with azide - store at 2 to 8C. Antibody without azide - store at -20 to -80C. Host Mouse Gene ID 6663 Gene Symbol SOX10 Species Human, Mouse Marker Melanoma Marker Melanoma Marker Specificity/Sensitivity The specificity of this monoclonal antibody to its intended target was validated by HuProITM Array, containing more than 19,000, full-length human proteins. Recognizes a protein of -58bA, identified as SOX10. This monoclonal antibody is highly specific and does not cross-react with other members of the SOX-family. SOX genes comprise a family of genes that are related to the mammalian sex-determining gene SRY. These genes similarly contain sequences that encode for the HMG-box domain, which is responsible for the sequence-specific DNA-binding activity. SOX-10 is a sensitive marker of melanoma, including conventional, spindled, and desmoplastic subtypes. It is expressed by metastatic melanomas and nodal capsular nevus in sentinel lymph nodes, but not by other lymph node components such as dendritic cells, which usually express \$100 protein. Commonly used melanoma markers, such as anti-HMB-4s and anti-Melan-A, are poorly expressed in desmoplastic melanomas. SOX-10 is moderately to strongly expressed in Schwano radical in Schwanoma such as dendritic cells, which usually express fine considered as a very reliable marker for recognizing residual desmoplastic melanomas in last cells. Product Application Details

	·
Applications	Western Blot, Simple Western, Flow (Intracellular), Immunohistochemistry, Immunohistochemistry-Paraffin, Protein Array
Recommended Dilutions	Western Blot 1-2 ug/ml, Simple Western, Immunohistochemistry, Immunohistochemistry-Paraffin 1-2 ug/ml, Protein Array 1:100-1:2000, Flow (Intracellular)
Application Notes	Immunohistochemistry (Formalin-fixed): 1-2ug/ml for 30 minutes at RT. Staining of formalin-fixed tissues requires heating tissue sections in 10mM Tris with 1mM EDTA, pH 9.0, for 45 min at 95C followed by cooling at RT for 20 minutes. Optimal dilution for a specific application should be determined. SOX10 Antibody (SOX10/991) validated for Simple Western from a verified customer review.

Protein Array: SOX10 Antibody (SOX10/991) [NBP2-59620] - containing more than 19,000 full-length human proteins. Z- and S- Score: The Z-score represents the strength of a signal that an antibody (in combination with a fluorescently-tagged anti-IgG secondary) produces when binding to a particular protein on the HuProt array. Z-scores are described in units of standard deviations above the mean value of all signals generated on that array. If targets on HuProt are arranged in descending order of the Z-score, the S-score is the difference between the Z-score. S-score therefore represents the relative target specificity of an Ab to its intended target. An Ab is considered to specific to its intended target, if the Ab has an S-score of at least 2.5. For example, if Ab binds to protein X with a Z-score of 43 and to protein Y with a Z-score of 14, then the S-score for the binding of that Ab to protein X is equal to 29

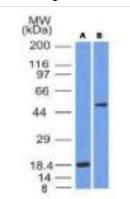

Western Blot: SOX10 Antibody (SOX10/991) [NBP2-59620] - Western Blot Analysis of COLO-38 cell lysate usingSOX10 antibody (SOX10/991).

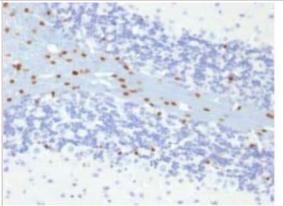

Immunohistochemistry-Paraffin: SOX10 Antibody (SOX10/991) [NBP2-59620] - Formalin-fixed, paraffin-embedded Human Melanoma stained with SOX10 Mouse Monoclonal Antibody (SOX10/991).

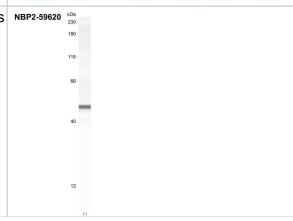

Western Blot: SOX10 Antibody (SOX10/991) [NBP2-59620] - analysis of SOX10 (A) Recombinant protein (B) A375 Cell lysate using SOX10 Mouse Monoclonal Antibody (SOX10/991).

Immunohistochemistry-Paraffin: SOX10 Antibody (SOX10/991) [NBP2-59620] - Formalin-fixed, paraffin-embedded Mouse Brain stained with SOX10 Mouse Monoclonal Antibody (SOX10/991).

Simple Western: SOX10 Antibody (SOX10/991) [NBP2-59620] - Analysis of SOX10 antibody on mouse hippocampus sample. Primary antibody dilution: 1:50.1 ug/uL protein. Image from verified customer review.
