Product Information

DDIT4L Antibody (DDIT-03) [Alexa Fluor® 700]

Unit Size Concentration Please see the vial label for concentration. If unlisted please contact technical services. Storage Store at 4C in the dark. Clonality Monoclonal Clone DDIT-03 Preservative 0.05%, Sodium Azide Isotype IgG1 Conjugate Alexa Fluor 700 Purity Protein A purified Buffer 50mM Sodium Borate Product Description Host Mouse Gene ID 115265 Gene Symbol DDIT4L Species Human Specificity/Sensitivity The antibody MEM-18 reacts with CD14, a 53-55 kDa GPI (glycosylphosphalidylinosib)-linked membrane glycoprotein expressed on monocytes, macrophages. In human, the epitope recognized by MEM-18 is located between amino acids 57-64. Immunogen N-terminal recombinant fragment of human DDIT4L (amino acids 2-98) Notes Alexa Fluor (R) products are provided under an intellectual property license from Life Technologies Corporation. The purchase of this product and components of the product only in research conducted by the buyer (whether the buyer is an academic or for-profit entity). The sale of this product is expressly conditioned on the buyer not using the product or its components; (i) in manufacturing; (ii) to provide a service, information, or ada may include, but is not limited to use of the product or its components; (i) in manufacturing; (ii) to provide a service, information, or data in return for payment; (iii) for therapeutic, diagnostic or prophylactic purposes; or (iv) for resale, regardless of whether they are resold for use in research. For information on purchasing a license to this product for burgotes in made on demand. Actual recovery may vary from the stated volume of this product. The volume will be greater than or equal to the unit size stated on the datasheet.		
Storage Store at 4C in the dark. Clonality Monoclonal Clone DDIT-03 Preservative 0.05% Sodium Azide Isotype IgG1 Conjugate Alexa Fluor 700 Purity Protein A purified Buffer 50mM Sodium Borate Product Description Host Mouse Gene ID 115265 Gene Symbol DDIT4L Species Human Specificity/Sensitivity The antibody MEM-18 reacts with CD14, a 53-55 kDa GPI (glycosylphosphatidylinositol)-linked membrane glycoprotein expressed on monocytes, macrophages and weakly on granulocytes; also expressed by most lissue macrophages. In human, the epitope recognized by MEM-18 is located between amino acids 57-64. Immunogen N-terminal recombinant fragment of human DDIT4L (amino acids 2-98) Notes Alexa Fluor (R) products are provided under an intellectual property license from Life Technologies Corporation. The purchase of this product cand components of the product only in research conducted by the buyer (whether the buyer is an academic or for-poff entity). The sale of this product and components of the product or its components, or any materials made using the product or its components, or any materials made using the product or its components, or any materials made using the product or its components, or any materials made using the product or its components, or any materials made using the product or its components, or any materials made using the product or its components, or prophylactic purposes; or (iv) for resale, regardless of whether they are resold for use in research. For information on purchasing a license to this product to purposes other than as described above, contact Life Technologies Corporation, 5791 Van Allen Way, Carlsbad, CA 92008 USA or outlicensing@lifetech.com. This conjugate is made on demand. Actual recovery may vary from the stated volume of this product. The	Unit Size	0.1 ml
