| Species                     | Human, Primate                                                                                                                                                                         |
| Specificity/Sensitivity     | The mouse monoclonal antibody B1 (also known as B1.1) recognizes TCR gamma/delta, the subtype of T cell receptor expressed mainly in epithelial tissues and at the sites of infection. |
| Immunogen                   | TCR gamma/delta, the subtype of T cell receptor expressed mainly in epithelial tissues and at the sites of infection.                                                                  |
| Notes                       | Sold under license from the Howard Hughes Medical Institute, Janelia Research Campus.                                                                                                  |
| Product Application Details |                                                                                                                                                                                        |
| Applications                | Flow Cytometry, Flow (Cell Surface), Functional, Immunohistochemistry, Immunohistochemistry-Frozen, Immunohistochemistry-Paraffin                                                      |
| Recommended Dilutions       | Flow Cytometry, Immunohistochemistry, Immunohistochemistry-Paraffin, Immunohistochemistry-Frozen, Functional, Flow (Cell Surface)                                                      |
| Application Notes           | Optimal dilution of this antibody should be experimentally determined.                                                                                                                 |
