**NBP2-62391****Adenovirus Native Protein**

| <b>Product Information</b>     |                                          |
|--------------------------------|------------------------------------------|
| <b>Unit Size</b>               | 1 ml                                     |
| <b>Concentration</b>           | 2.3 mg/ml                                |
| <b>Storage</b>                 | Store at -70C. Avoid freeze-thaw cycles. |
| <b>Preservative</b>            | No Preservative                          |
| <b>Buffer</b>                  | Minimum Essential Media                  |
| <b>Target Molecular Weight</b> | 30 kDa                                   |

| <b>Product Description</b> |                                                                                                                                                                                                                                                          |
|----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Description</b>         | Native grade 2 adenovirus. adenoid 6 strain grown in MRC-5 cells in tissue culture.<br><br><b>Source:</b> Adenovirus                                                                                                                                     |
| <b>Species</b>             | Virus                                                                                                                                                                                                                                                    |
| <b>Preparation Method</b>  | Grown in MRC-5 cells. Optimally infected cells are disrupted by sonication and subjected to low speed centrifugation. The cell lysate is pooled with supernatant from the infected culture and concentrated using ultrafiltration with a 30 kDa cut off. |

| <b>Product Application Details</b> |       |
|------------------------------------|-------|
| <b>Applications</b>                | ELISA |
| <b>Recommended Dilutions</b>       | ELISA |
