| Species                     | Human, Mouse, Rat, Monkey, Primate                                                                                                                                                                                                                                                                                                              |
| Reactivity Notes            | Please note that this antibody is reactive to Mouse and derived from the same host, Mouse. Mouse-On-Mouse blocking reagent may be needed for IHC and ICC experiments to reduce high background signal. You can find these reagents under catalog numbers PK-2200-NB and MP-2400-NB. Please contact Technical Support if you have any questions. |
| Immunogen                   | Recombinant protein fragment corresponding to amino acids 58-277 of human Proteasome 20S beta 7 (NP_002790) produced in E.coli.                                                                                                                                                                                                                 |
