NBP2-75902PEATT594

CD25/IL-2R alpha Antibody (Basiliximab) [PE/Atto594] - Chimeric

Product Information	
0.1 ml	
Please see the vial label for concentration. If unlisted please contact technical services.	
Store at 4C in the dark. Do not freeze.	
Monoclonal	
Basiliximab	
0.05% Sodium Azide	
IgG1 Kappa	
PE/Atto594	
Protein A purified	
PBS	
Product Description	
Human	
3559	
IL2RA	
Human, Cynomolgus Monkey, Rhesus Macaque	
Basiliximab recognises the human IL-2R and binds to the epitope (116)ERIYHFV (122) within the extracellular domain of the CD25 subunit -binding is abolished when 2 or more residues within the epitope are mutated. This epitope overlaps with the interaction site of CD25 and IL-2. CD25 is found in the high-affinity IL-2R ((alpha)(beta)(gamma)c) -T cells only express CD25 upon activation. IL-2 binding to IL-2R on T cells modulates proliferation and differentiation.	
Basiliximab was prepared by immunizing BALB/c mice with CTC 16 cells.	
Product Application Details	
Flow Cytometry	
Flow Cytometry	
Optimal dilution of this antibody should be experimentally determined. For optimal results using our Tandem dyes, please avoid prolonged exposure to light or extreme temperature fluctuations. These can lead to irreversible degradation or decoupling. When staining intracellular targets, specific attention to the fixation and permeabilization steps in your flow protocol may be required. Please contact our technical support team at technical@novusbio.com if you have any questions.
