NBP2-75902PECY55

CD25/IL-2R alpha Antibody (Basiliximab) [PE/Cy5.5] - Chimeric

		,
Product	Information	

Product Information		
Unit Size	0.1 ml	
Concentration	Please see the vial label for concentration. If unlisted please contact technical services.	
Storage	Store at 4C in the dark. Do not freeze.	
Clonality	Monoclonal	
Clone	Basiliximab	
Preservative	0.05% Sodium Azide	
Isotype	IgG1 Kappa	
Conjugate	PE/Cy5.5	
Purity	Protein A purified	
Buffer	PBS	
Product Description		
Host	Human	
Gene ID	3559	
Gene Symbol	IL2RA	
Species	Human, Cynomolgus Monkey, Rhesus Macaque	
Specificity/Sensitivity	Basiliximab recognises the human IL-2R and binds to the epitope (116)ERIYHFV (122) within the extracellular domain of the CD25 subunit -binding is abolished when 2 or more residues within the epitope are mutated. This epitope overlaps with the interaction site of CD25 and IL-2. CD25 is found in the high-affinity IL-2R ((alpha)(beta)(gamma)c) -T cells only express CD25 upon activation. IL-2 binding to IL-2R on T cells modulates proliferation and differentiation.	
Immunogen	Basiliximab was prepared by immunizing BALB/c mice with CTC 16 cells.	
Product Application Details		
Applications	Flow Cytometry	
Recommended Dilutions	Flow Cytometry	
Application Notes	Optimal dilution of this antibody should be experimentally determined. For optimal results using our Tandem dyes, please avoid prolonged exposure to light or extreme temperature fluctuations. These can lead to irreversible degradation or decoupling. When staining intracellular targets, specific attention to the fixation and permeabilization steps in your flow protocol may be required. Please contact our technical support team at technical@novusbio.com if you have any questions.
