**NBP2-77674****Rectum Matched Tumor and Normal Tissue Slides (Tumor)- Frozen**

| <b>Product Information</b>         |  |
|------------------------------------|--|
| <b>Unit Size</b>                   | 10 Slides  |
| <b>Concentration</b>               | Concentration is not relevant for this product. Please see the protocols for proper use of this product.   |
| <b>Storage</b>                     | Store at -70C. Avoid freeze-thaw cycles.   |
| <b>Product Description</b>         |  |
| <b>Description</b>                 | <p>Frozen tissue slides are ideal for rapid cellular localization of RNA and protein expression, especially for antibodies that don't recognize paraffin embedded tissue.</p> <p>Tissues were snap frozen in liquid nitrogen immediately after excision, and embedded in OCT. Frozen tissue sections in each pair are prepared from the same donor. Tissue sections are 5-10 m in thickness, mounted on positively charged glass slides, and fixed by cold acetone. At least one of the tissue slides from each lot was stained with H &amp; E for quality assurance. Product is supplied as 5 diseased slides and 5 adjacent normal slides.</p> |
| <b>Species</b>                     | Human  |
| <b>Notes</b>                       | Donor information available upon request   |
| <b>Lysate Type</b>                 | Matched Tumor and Normal Tissue  |
| <b>Lysate Tissue</b>               | Rectal   |
| <b>Lysate Tissue Condition</b>     | Tumor  |
| <b>Product Application Details</b> |  |
| <b>Applications</b>                | Hematoxylin and Eosin Stain, Immunohistochemistry, Immunohistochemistry-Frozen, In-situ Hybridization  |
| <b>Recommended Dilutions</b>       | Immunohistochemistry, Immunohistochemistry-Frozen, In-situ Hybridization, Hematoxylin and Eosin Stain  |
| <b>Application Notes</b>           | Each individual tissue spot should be >90% core retention and total core lost from 1 slide should be no more than 5%   |
