ACTH Antibody (CLIP/1418) [Alexa Fluor® 750] - C-terminus

Product Information           Unit Size         0.1 ml           Concentration         Please see the vial label for concentration. If unisted please contact technical services.           Storage         Store at 4C in the dark.           Clonality         Monoclonal           Clone         CLIP/1418           Preservative         0.05% Sodium Azide           Isotype         IgG1 Kappa           Conjugate         Alexa Fluor 750           Purity         Protein A or G purified           Buffer         50mM Sodium Borate           Product Description         Feedback           Host         Mouse           Gene ID         5443           Gene Symbol         POMC           Species         Human           Specificity/Sensitivity         ACTH (same as Corticotropin) is a 39 amino acid active peptide produced by the anterior pituitary. This monoclonal antibody is specific to CLIP (aa25-39 of ACTH); does not react with Synacthen (aa1-24 of ACTH). POMC (proopiomelanocortin or corticotropin-lipotropin) is a 257 amino acid polypeptide produced by cells of immune system (T-cells, B-cells, and macrophages) in response to stimuli associated with stress. POMC is cleaved into the hormone, beta-MSH, gamma-MSH, CLIP (corticotropin-like intermediary peptide), Lipotropin-beta, Lipotropin-gamma, beta-endorphin and Met-enkephalin. ACTH is also produced by cells of immune system (T-cells, B-cells, and macrophages) in response to stimuli associated with stress. A	, , , , , , , , , , , , , , , , , , ,
