Product Datasheet

CD31/PECAM-1 Antibody (JC/70A) - Azide and BSA Free NBP2-80641

Unit Size: 0.1 ml

Store at 4C short term. Aliquot and store at -20C long term. Avoid freeze-thaw cycles. After opening store under sterile conditions.

NBP2-80641

CD31/PECAM-1 Antibody (JC/70A) - Azide and BSA Free

Product Information	
Unit Size	0.1 ml
Concentration	1 mg/ml
Storage	Store at 4C short term. Aliquot and store at -20C long term. Avoid freeze-thaw cycles. After opening store under sterile conditions.
Clonality	Monoclonal
Clone	JC/70A
Preservative	No Preservative
Isotype	IgG1 Kappa
Purity	Protein G purified
Buffer	PBS
Target Molecular Weight	82.5 kDa
Product Description	
Host	Mouse
Gene ID	5175
Gene Symbol	PECAM1
Species	Human, Mouse, Feline, Rabbit
Reactivity Notes	Rabbit (PMID: 21533193) and Mouse (PMID: 29700126) reactivity reported in scientific literature.
Immunogen	This CD31/PECAM-1 Antibody (JC/70A) was developed against a membrane preparation of a spleen from a patient with hairy cell leukemia.
Product Application Details	
Applications	Western Blot, ELISA, Flow Cytometry, Flow (Cell Surface), Immunocytochemistry/ Immunofluorescence, Immunohistochemistry, Immunohistochemistry-Frozen, Immunohistochemistry-Paraffin, CyTOF-ready, Dual RNAscope ISH-IHC, Immunocytochemistry, Knockout Validated
Recommended Dilutions	Western Blot 1:100-1:500, Flow Cytometry 1:100-1:250, ELISA reported in scientific literature (PMID 8307606), Immunohistochemistry, Immunocytochemistry/ Immunofluorescence, Immunohistochemistry-Paraffin 1:10-1:25, Immunohistochemistry-Frozen, Flow (Cell Surface) 1:100-1:250, Immunocytochemistry, CyTOF-ready, Knockout Validated, Dual RNAscope ISH-IHC
Application Notes	This CD31/PECAM1 Antibody (JC/70A) reacts with an ~100 kDa glycoprotein expressed by endothelial cells and ~130 kDa glycoprotein present in platelets. It stains endothelial cells in normal as well as malignant tissues. Prior to immunostaining paraffin tissues, antigen retrieval with sodium citrate buffer (pH 6.0) is recommended.

Images

Analysis of CD31/PECAM1 expression in 1) Jurkat whole cell lysate, 2) human platelet lysate and 3) U937 whole cell lysate. Image from the standard format of this antibody.

Rabbit Heart, CD31 Stained Red. Image from verified customer review.

Image from the standard format of this antibody.

FFPE human tonsil stained with CD31/PECAM-1 Antibody (JC/70A). Image from the standard format of this antibody.

A surface stain was performed on Jurkat cells with the Dylight 550 conjugate of CD31/PECAM-1 Antibody (JC/70A) (NB600-562R, blue) and a matched isotype control (orange). Cells were incubated in an antibody dilution of 5 ug/mL for 20 minutes at room temperature. Both antibodies were directly conjugated to DyLight 550.

Imaging of Feline Endothelial cells with antibody dilution of 1:25. CD31/PECAM-1 (Red), DAPI (Blue). This image was submitted via customer Review. Image from the standard format of this antibody.

HUVEC cells were fixed for 10 minutes using 10% formalin and then permeabilized for 5 minutes using 1X TBS + 0.5% Triton X-100. The

using a 40X objective. Image from the standard format of this antibody.

Analysis of CD31/PECAM1 in human spleen using DAB with hematoxylin counterstain. Image from the standard format of this antibody.

Analysis using the Biotin conjugate of NB600-562. Comparison between mouse (lung, top) and human (prostate, bottom) staining using anti-CD31 antibody. Data demonstrates that the antibody stains human, but not mouse CD31. Image from verified customer review

Formalin-fixed paraffin-embedded tissue sections of human metastatic tonsil were probed for CD31 mRNA (ACD RNAScope probe, catalog # 487381; Fast Red chromogen, ACD catalog # 322500). Adjacent tissue section was processes for immunohistochemistry using mouse monoclonal (NB600-562) at 1:25 dilution for 1 hour at room temperature followed by incubation with the anti-mouse IgG VisUCyte HRP Polymer Antibody (Catalog # VC001) and DAB chromogen (yellow-brown). Tissue was counterstained with hematoxylin (blue). Image from the standard format of this antibody.

CD31/PECAM-1 was detected in immersion fixed THP-1 (red, positive) but not THP-1 KO (negative) cells using 8 ug/mL Mouse Anti-Human CD31/PECAM-1 (JC/70A) Monoclonal Antibody (Catalog # NB600-562) for 3 hours at room temperature. Cells were stained with the NorthernLights(TM) 557-conjugated Donkey anti-Mouse IgG Secondary Antibody (red, Catalog # NL007)) and and counterstained with DAPI (blue). Image from the standard format of this antibody.
