| <b>Description</b> | Novus Biologicals Rabbit myosin X Antibody - BSA Free (NBP2-94033) is a polyclonal antibody validated for use in WB. All Novus Biologicals antibodies are covered by our 100% guarantee.                                        |
| <b>Host</b>        | Rabbit                                                                                                                                                                                                                          |
| <b>Gene ID</b>     | 4651                                                                                                                                                                                                                            |
| <b>Gene Symbol</b> | MYO10                                                                                                                                                                                                                           |
| <b>Species</b>     | Human, Mouse                                                                                                                                                                                                                    |
| <b>Immunogen</b>   | Recombinant fusion protein containing a sequence corresponding to amino acids 845-944 of human MYO10 (NP_036466.2).<br>EAELRAQQEEETRKQQELEALQKSQKEAELTRELEKQKENKQVEEILRLEKEIE<br>DLQRMKEQQELSLTEASLQKLQERRDQELRRLEEEACRAAQEFLES |

**Product Application Details**

|                              |                             |
|------------------------------|-----------------------------|
| <b>Applications</b>          | Western Blot                |
| <b>Recommended Dilutions</b> | Western Blot 1:500 - 1:2000 |

**Images**

Western Blot: myosin X Antibody [NBP2-94033] - Western blot analysis of extracts of various cell lines, using myosin X antibody (NBP2-94033) at 1:1000 dilution. Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) at 1:10000 dilution. Lysates/proteins: 25ug per lane. Blocking buffer: 3% nonfat dry milk in TBST. Detection: ECL Enhanced Kit. Exposure time: 90s.
