| Unit Size                  | 100 ul                                                                                      |
| Concentration              | Please see the vial label for concentration. If unlisted please contact technical services. |
| Storage                    | Store at 4C short term. Aliquot and store at -20C long term. Avoid freeze-thaw cycles.      |
| Clonality                  | Polyclonal                                                                                  |
| Preservative               | 0.03% Proclin 300                                                                           |
| Isotype                    | IgG                                                                                         |
| Purity                     | Antigen and protein A Affinity-purified                                                     |
| Buffer                     | PBS                                                                                         |
| <b>Product Description</b> |                                                                                             |
| Description                | This antibody can be stored at 2C-8C for one month without detectable loss of               |

| This antibody can be stored at 2C-8C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20C to -80C. Avoid repeated freeze-thaw cycles. |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Rabbit                                                                                                                                                                                                                      |
| 9858                                                                                                                                                                                                                        |
| PPP1R26                                                                                                                                                                                                                     |
| Human                                                                                                                                                                                                                       |
| Produced in rabbits immunized with E. coli-derived Human PPP1R26 fragment.                                                                                                                                                  |
|                                                                                                                                                                                                                             |

| <b>Product Application Details</b> |                                                     |
|------------------------------------|-----------------------------------------------------|
| Applications                       | Immunocytochemistry/ Immunofluorescence             |
| Recommended Dilutions              | Immunocytochemistry/ Immunofluorescence 1:100-1:500 |

#### **Images**

Immunocytochemistry/Immunofluorescence: PPP1R26 Antibody [NBP3-06098] - Immunofluorescence staining of PPP1R26 in MCF7 cells. Cells were fixed with 4% PFA, permeabilzed with 0.3% Triton X-100 in PBS,blocked with 10% serum, and incubated with rabbit anti-Human PPP1R26 polyclonal antibody (dilution ratio 1:200) at 4 degrees celsius overnight. Then cells were stained with the Alexa Fluor (TM) 488-conjugated Goat Anti-rabbit IgG secondary antibody (green). Positive staining was localized to Nucleus.
