#### NBP3-11599DL594

Kappa Light Chain Antibody (Kap-56) [DyLight 594]

0.1 ml
Please see the vial label for concentration. If unlisted please contact technical services.
Store at 4C in the dark.
Monoclonal
Кар-56
0.05% Sodium Azide
IgG1 Kappa
DyLight 594
Protein A or G purified
50mM Sodium Borate
Mouse
3514
IGKC
Human
B-Cell Marker
This monoclonal antibody is specific to kappa light chain of immunoglobulin and shows no cross-reaction with lambda light chain or any of the five heavy chains. In mammals, the two light chains in an antibody are always identical, with only one type of light chain, kappa or lambda. The ratio of Kappa to Lambda is 70:30. However, with the occurrence of multiple myeloma or other B-cell malignancies this ratio is disturbed. Antibody to the kappa light chain is reportedly useful in the identification of leukemias, plasmacytomas, and certain non-Hodgkins lymphomas. Demonstration of clonality in lymphoid infiltrates indicates that the infiltrate is malignant.
Human lymphocytes stimulated
