## NBP3-11601H

GnRHR Antibody (A9E4) [HRP]

Unit Size 0.1 ml	
0.1 IIII	
<b>Concentration</b> Please see the vial label for concentration. If unlisted please conservices.	tact technical
Store at 4C in the dark.	
<b>Clonality</b> Monoclonal	
Clone A9E4	
Preservative No Preservative	
Isotype IgG1 Kappa	
Conjugate HRP	
Purity Protein A or G purified	
<b>Buffer</b> PBS	
Product Description	
Host Mouse	
<b>Gene ID</b> 2798	
Gene Symbol GNRHR	
Species Human	
Reactivity Notes Predicted to react with Porcine, Rabbit.	
Specificity/Sensitivity Recognizes an epitope on the extracellular domain of gonadotro	pin releasing
hormone (GnRH) receptor or luteinizing hormone receptor (LHCC (also designated luteinizing hormone) plays a role in spermatoge ovulation by stimulating the testes and ovaries to produce steroic (also designated choriogonadotropin) production in the placenta estrogen and progesterone levels during the first trimester of pre and testes abundantly express luteinizing hormone/choriogonadom GnRH receptor contains seven hydrophobic transmembrane dorn by hydrophilic extracellular and intracellular loops characteristic of coupled receptors. GnRH stimulates the gonadotrophs of the antisecrete luteinizing hormone (LH) as well as follicle-stimulating hormone (LH) as well as follicle-stimulating hormones the protective effect of pregnancy and Gonado breast cancer. The expression of GnRH on breast carcinoma couthed degree of tumor differentiation. GnRH-positive breast tumors frequently in tumors with greater cell differentiation in premenopa GnRH is present in luteal and granulosa cells as well as in ovariamembrane preparations.	GR). Lutropin enesis and ds. Gonadotropin maintains gnancy. Ovaries otropin receptor. mains connected of G-protein terior pituitary to ormone (FSH). tropin against rrelates in part to occur more ausal women. an cell
(also designated luteinizing hormone) plays a role in spermatoge ovulation by stimulating the testes and ovaries to produce steroic (also designated choriogonadotropin) production in the placenta estrogen and progesterone levels during the first trimester of pre and testes abundantly express luteinizing hormone/choriogonadoral GnRH receptor contains seven hydrophobic transmembrane dorn by hydrophilic extracellular and intracellular loops characteristic of coupled receptors. GnRH stimulates the gonadotrophs of the antisecrete luteinizing hormone (LH) as well as follicle-stimulating hormone (LH) as well as follicle-stimulating hormones the protective effect of pregnancy and Gonadoral breast cancer. The expression of GnRH on breast carcinoma conthe degree of tumor differentiation. GnRH-positive breast tumors frequently in tumors with greater cell differentiation in premenopal GnRH is present in luteal and granulosa cells as well as in ovarial	GR). Lutropin enesis and ds. Gonadotropin maintains gnancy. Ovaries otropin receptor. mains connected of G-protein terior pituitary to ormone (FSH). tropin against rrelates in part to occur more ausal women. an cell
(also designated luteinizing hormone) plays a role in spermatoge ovulation by stimulating the testes and ovaries to produce steroic (also designated choriogonadotropin) production in the placenta estrogen and progesterone levels during the first trimester of pre and testes abundantly express luteinizing hormone/choriogonadom GnRH receptor contains seven hydrophobic transmembrane dor by hydrophilic extracellular and intracellular loops characteristic of coupled receptors. GnRH stimulates the gonadotrophs of the and secrete luteinizing hormone (LH) as well as follicle-stimulating hormone (LH) as well as follicle-stimulating hormones the protective effect of pregnancy and Gonado breast cancer. The expression of GnRH on breast carcinoma couthe degree of tumor differentiation. GnRH-positive breast tumors frequently in tumors with greater cell differentiation in premenopa GnRH is present in luteal and granulosa cells as well as in ovariamembrane preparations.  Immunogen  A synthetic peptide aa 1-29 (MANSASPEQNQHCSAINNSIPLMO)	GR). Lutropin enesis and ds. Gonadotropin maintains gnancy. Ovaries otropin receptor. mains connected of G-protein terior pituitary to ormone (FSH). tropin against rrelates in part to occur more ausal women. an cell
(also designated luteinizing hormone) plays a role in spermatoge ovulation by stimulating the testes and ovaries to produce steroic (also designated choriogonadotropin) production in the placenta estrogen and progesterone levels during the first trimester of pre and testes abundantly express luteinizing hormone/choriogonadoral GnRH receptor contains seven hydrophobic transmembrane dor by hydrophilic extracellular and intracellular loops characteristic of coupled receptors. GnRH stimulates the gonadotrophs of the animal secrete luteinizing hormone (LH) as well as follicle-stimulating hormone (LH) as well as follicle-stimulating hormones the protective effect of pregnancy and Gonadoral breast cancer. The expression of GnRH on breast carcinoma contact the degree of tumor differentiation. GnRH-positive breast tumors frequently in tumors with greater cell differentiation in premenopa GnRH is present in luteal and granulosa cells as well as in ovariamembrane preparations.  Immunogen  A synthetic peptide aa 1-29 (MANSASPEQNQHCSAINNSIPLMO the N-terminal of human GnRHR.	GR). Lutropin enesis and ds. Gonadotropin maintains gnancy. Ovaries otropin receptor. mains connected of G-protein terior pituitary to ormone (FSH). tropin against rrelates in part to occur more ausal women. an cell
(also designated luteinizing hormone) plays a role in spermatoge ovulation by stimulating the testes and ovaries to produce steroic (also designated choriogonadotropin) production in the placenta estrogen and progesterone levels during the first trimester of pre and testes abundantly express luteinizing hormone/choriogonador GnRH receptor contains seven hydrophobic transmembrane dor by hydrophilic extracellular and intracellular loops characteristic of coupled receptors. GnRH stimulates the gonadotrophs of the ani secrete luteinizing hormone (LH) as well as follicle-stimulating hormone (LH) as well	GR). Lutropin enesis and ds. Gonadotropin maintains gnancy.
