NBP3-11769**CD63 Immunobeads for Exosome Isolation****Product Information**

Unit Size	10 Reactions
Concentration	Please see the protocols for proper use of this product. If no protocol is available, contact technical services for assistance.
Storage	Store at 4C.

Product Description

Description	CD63 Immunocapture Beads are 0.4 um latex beads covalently coupled with antibodies against extracellular vesicle (EV) surface antigen CD63. Samples containing EVs are incubated with Immunocapture Beads for rapid and specific isolation of EVs expressing CD63. Using the supplied Elution Buffer, EVs can be eluted from Immunocapture beads and used in downstream analyses such as protein profiling and nucleic acid extraction. Immunobeads can be re-used after incubation with Bead Regeneration Buffer.
Species	Human
Kit Components	CD63 Immunocapture Beads Exosome Elution Buffer Bead Regeneration Buffer
Suitable Sample Type	Cell culture supernatant
Sample Volume	0.5-1 mL
