NBP3-12182**BLUE HRP Staining Kit (Colorimetric)**

Product Information	
Unit Size	30 ml
Concentration	Concentration is not relevant for this product. Please see the protocols for proper use of this product.
Storage	Store at 4C.
Product Description	
Description	<p>Prepare the Following Solutions Before Use</p> <ol style="list-style-type: none"> 1. Aliquot 1mL of BLUE HRP Substrate Buffer in a mixing bottle. 2. Add one drop (~20ul) of concentrated BLUE HRP Chromogen solution. 3. Replace tip, mix, and allow solution to reach room temperature before using. 4. The BLUE HRP chromogen-substrate working solution is light sensitive and should be kept away from light as much as possible. 5. Working solution is stable for up to 24 hour, for optimal results prepare fresh reagent. <p>Staining Procedure</p> <ol style="list-style-type: none"> a. Once sections have been incubated with peroxidase, wash sections with wash buffer then follow protocol of choice: *** bring the solutions to Room Temperature before mixing. Pre-Mix Working Solution: (Automation) BLUE HRP has a working solution stability of up to 24 hours and can be loaded directly onto instrument as a single solution. Reduce exposure to light to achieve optimal staining. Working solution is applied directly to slide. Incubate for 5-10 min. b. On Board Mixing: (Automation) Instruments that have on- board mixing capability can load the chromogen and substrate-buffer components independently. Working solution is made mixing reagents 1:50 in on-board mixing station before application to slide. Incubate for 5-10 min. c. Manual Use: Mix substrate-chromogen and buffer in a 1:50 ratio and apply directly to slide. Incubate for 5-10 min. <ol style="list-style-type: none"> 2) Counterstain with Hematoxylin or other counterstain. Wash with DI water followed by immuno wash buffer. 3) Mounting: Slides should be air dried (do not dehydrate in alcohol or xylene). After rinsing off counterstain in DI H₂O, leave slides on benchtop for at least 20 minutes to air dry, and then permanently mount. <p>Recommendation: For best color preservation and long term slide storage, we recommend to use Tissue Preservation Solution - HRP/AP assays after counterstaining.</p>
Kit Components	BLUE HRP Substrate Buffer 30 mL, BLUE HRP Chromogen 1 mL, Empty Mixing Bottle 1 mL
Product Application Details	
Applications	Immunohistochemistry, Immunohistochemistry-Paraffin, In-situ Hybridization
Recommended Dilutions	Immunohistochemistry, Immunohistochemistry-Paraffin, In-situ Hybridization
