| <b>Gene Symbol</b>                 | S                                                                                                                                                                                                                                                  |
| <b>Species</b>                     | SARS-CoV-2                                                                                                                                                                                                                                         |
| <b>Immunogen</b>                   | Anti-SARS-CoV-2 Spike 156-157EF antibody was raised against a peptide corresponding to 13 amino acids near the amino terminal domain of SARS-CoV-2 Spike protein. The immunogen is located within 130-180 amino acids of SARS-CoV-2 Spike protein. |
| <b>Product Application Details</b> |                                                                                                                                                                                                                                                    |
| <b>Applications</b>                | Western Blot, Immunohistochemistry-Paraffin, ELISA, Immunohistochemistry                                                                                                                                                                           |
| <b>Recommended Dilutions</b>       | Western Blot, ELISA, Immunohistochemistry, Immunohistochemistry-Paraffin                                                                                                                                                                           |
| <b>Application Notes</b>           | Optimal dilution of this antibody should be experimentally determined.                                                                                                                                                                             |
