Product Description	
Mouse	
5175	
PECAM1	
Human	
Endothelial Cell Marker	
Anti-CD31 has shown to be highly specific and sensitive for vascular endothelial cells. Staining of nonvascular tumors (excluding hematopoietic neoplasms) is are. CD31 monoclonal antibody reacts with normal, benign, and malignant endothelial cells which make up blood vessel lining. The level of CD31 expression can help to determine the degree of tumor angiogenesis, and a high evel of CD31 expression may imply a rapidly growing tumor and potentially a predictor of tumor recurrence.	
Recombinant fragment (around aa 625-738) of human CD31/PECAM-1 protein exact sequence is proprietary)
