NBP3-26837**Tangential Flow Filtration (TFF)-Small EV Isolation**

Product Information	
Unit Size	1 Units
Concentration	Please see the protocols for proper use of this product. If no protocol is available, contact technical services for assistance.
Storage	Store at room temperature.
Product Description	
Description	Tangential flow filter-EV are a filter cartridge of hollow polyethersulfone fibers used for purification and concentration of extracellular vesicles. The filter allows a rapid, reproducible and scalable purification of EVs. It can be used on the lab bench for purifying small volume of samples or connected with a mechanical system for purifying larger volumes. During the purification, the sample is simultaneously concentrated.
Suitable Sample Type	EV containing matrices (urine, cell culture supernatant, plasma, serum)
Sample Volume	10 mL - 1000 mL
