NBP3-57720-1Set

Complement Component C3a Antibody Pair [Biotin]

Product Information	
Unit Size	1 Set
Concentration	Concentration of individual antibodies may be found on the vial label. If unlisted please contact technical services.
Storage	Storage of components varies. See protocol for specific instructions.
Conjugate	Biotin

Product Description	
Description	Contains a capture antibody, detection antibody, and recombinant protein standard for assay development. These antibodies have been validated to function together in an ELISA format using the provided standard. Optimal buffers, antibody concentrations, incubation times, temperatures, and assay conditions have not been predetermined, allowing researchers to optimize assay sensitivity and dynamic range based on their specific sample type and experimental requirements. The quantities of components are not matched, and individual components may be purchased separately. This product is for research use only.
Gene ID	718
Gene Symbol	C3
Species	Rabbit
Assay Type	Sandwich ELISA
Suitable Sample Type	Cell culture supernatants from rabbitsCan also be used to measure C3a in a wide variety of biological sample types reported in the literature, including serum, plasma, whole blood, and tissue lysates from organs such as liver, spleen, kidney, and lymph nodes. While the kit is optimized for cell culture supernatants, minor modifications to the protocol may be required when in other sample types to ensure optimal sensitivity and accuracy, allowing researchers to adjust buffers, antibody concentrations, incubation times, temperatures, and other assay conditions as needed.
Sample Volume	100 ul

Product Application Details	
Applications	ELISA, Sandwich ELISA
Recommended Dilutions	ELISA, Sandwich ELISA
