## CXCL15/Lungkine Antibody Pair [Biotin] NBP3-57737-1Set

Unit Size: 1 Set

Storage of components varies. See protocol for specific instructions.

| Conjugate            | Biotin                                                                                                                                                                                                                                                                                                                                                            |
| Product Description  |                                                                                                                                                                                                                                                                                                                                                                   |
| Description          | The ELISA kit contains a capture antibody, detection antibody, and recombinant protein standard validated for use together in an ELISA format; kit components are not supplied in matched quantities and may be purchased separately. This product is for research use only, not for use in diagnostic or therapeutic procedures, and is manufactured in the USA. |
| Gene ID              | 20309                                                                                                                                                                                                                                                                                                                                                             |
| Gene Symbol          | Cxcl15                                                                                                                                                                                                                                                                                                                                                            |
| Species              | Bat                                                                                                                                                                                                                                                                                                                                                               |
| Reactivity Notes     | Species with 100% Homology: Egyptian Rousette Bat                                                                                                                                                                                                                                                                                                                 |
| Assay Type           | Sandwich ELISA                                                                                                                                                                                                                                                                                                                                                    |
| Suitable Sample Type | Cell culture supernatants from Egyptian fruit bats ( <i>Rousettus aegyptiacus</i> ). Can also be used in additional biological sample types reported in the literature including serum, plasma, bronchoalveolar lavage (BAL) fluid, and tissue lysates, with minor protocol modifications recommended to optimize performance across different matrices.          |
| Sample Volume        | 100 ul                                                                                                                                                                                                                                                                                                                                                            |
