Product Datasheet

Ovalbumin Native Protein P5241

Unit Size: 1 g

Store at -4C in powder form. Store at -20C once reconstituted.

P5241

Ovalbumin Native Protein

Product Information Unit Size 1 g Concentration Lyoph Storage Store at -4C in powder form. Store at -20C once reconstituted. Preservative No Preservative Reconstitute in sterile water at 1-10mg/ml. We do not recommend reconstituting entire 1g, instead you may weight out a smaller amount, reconstitute i, aliquot, and store at -20/-80C. The remainign powder should remain stored at 4C. Purity >80% by SDS-PAGE and Coomassie blue staining Target Molecular Weight 45 kDa Product Description Ovalbumin is a glycoprotein that comprises 54% of the total proteins of egg white, and is important in several areas of research such as: protein structure , serpin structure and function, proteomics, and immunology. Source: Native protein purified from Egg Whites Source: Native protein purified from Egg Whites Gene ID 396058 Chicken Preparation Method Native protein purified from Egg White Notes This product is produced by and distributed for Abnova, a company based in Taiwan.
